SKILLS

- JavaScript
- HTML, CSS, Tailwind
- TypeScript
- MERN
- MySQL
- NextJs
- Python

EDUCATION

- [BRAC University](#) *JAN 2021 - Present*
 - Computer Science
 - CGPA 3.3 | ongoing
- Govt.Mohammadpur Model School & College (HSC) *2020*
 - GPA 5.00
- Govt.Science High School (SSC) *2018*
 - GPA 4.89

PROJECTS

❖ **WheelzOnRent - A vehicle, driver and garage-renting platform**

A comprehensive platform for vehicle and garage rentals. Users can browse, book rentals, and chat with owners in real time via Socket.IO. Implemented private chat threads for each vehicle. Built a modern, responsive UI using Tailwind CSS. Integrated user authentication, secure booking, and real-time communication to improve the rental experience.

Tech Stack: MERN, Socket.IO, DaisyUI, Tailwind

GitHub: <https://github.com/ahanaftanvir40/WheelZOnRent>

❖ **Project Echo - An all-in-one communication hub**

Developed a communication platform where users can create servers and organize text, audio, and video channels. Integrated real-time messaging with Socket.IO and video chat using LiveKit. Added role-based access control, server invites, and secure access. Built a scalable backend with Next.js, Prisma, and WebSockets, alongside a responsive UI using Tailwind CSS. Integrated Clerk for authentication.

Tech Stack: NextJs, Prisma, Clerk, MongoDB, Socket.IO, LiveKit, UploadThing, Shadcn

❖ **Trendy Kicks - e-commerce platform for high-end sneaker enthusiasts**

Trendy Kicks is a modern platform where users can browse premium sneakers, view details, and place orders effortlessly. The admin dashboard allows for easy management of sneaker listings and orders. The UI is sleek and user-friendly, ensuring a seamless experience for all.

Tech Stack: NextJs, AceternityUI, NextAuth, MongoDB
